

## Experience Certificate

Structured Data Systems Limited is a software development house that provides offshore software engineering solution services to small and medium sized software development companies and conforms to AS/NZS ISO 9001 and AS 3563 Quality Management Standards.

**Md. Abu Naser Bikas** S/O Abdus Sattar has been working for Structured Data Systems Ltd as Software Engineer since October 2008.

We have found him to be a self-motivated, talented and hard working professional who is able to work independently on a project. He has worked on the following projects:

Project: **AfriGIS Navigator for Blackberry.**  
Client: AfriGIS, South Africa.  
Description: Navigator for Blackberry mobile device which supports real time navigation, route planning, viewing map for any geographical location and may other features.  
Language: Blackberry Native API  
Role: Software Engineer & Lead Programmer.

Project: **Intiendo Mapserver.**  
Client: AfriGIS, South Africa.  
Language: C++/Visual C++  
Description: A web based map service provider run on Linux and Windows(like google maps).  
Role: Software Engineer & Lead Programmer.

Project: **GridHub.**  
Client: AfriGIS, South Africa.  
Language: Qt  
Description: Desktop based chatting software like gtalk, skype.  
Role: Software Engineer & Lead Programmer.

He has used the following development tools:

- Java, MS-Visual C++, gcc.
- Blackberry JDE
- Qt Creator
- Microsoft IIS, Apache Http Server.

I wish him all the success

**Reffat Zaman**
